Professional Summary

Backend .NET Developer with hands-on experience in building scalable enterprise applications using C#, ASP.NET MVC, Entity Framework Core, and SQL Server. Experienced in REST API development, 3-layer architecture, GST billing systems, and database optimization through corporate and government projects. Passionate about backend engineering, clean architecture, and solving real-world business problems.

Work Experience

Software Developer – Quantum Asia Pvt Ltd

Jan 2026 – Present

- Contributing to backend development using C#, .NET, MVC, and SQL Server, delivering feature modules on NIC-contracted projects.

Junior Software Developer – GINESYS (Ginni Systems Ltd.)

Apr 2025 – Dec 2025

- Developed and optimized scalable backend modules using C#, .NET, and SQL Server, improving query performance and resolving production issues through cross-functional collaboration.

Intern – National Informatics Centre (NIC)

Jan 2025 – Apr 2025

- Developed dynamic web modules using PHP, JavaScript, and Bootstrap with PostgreSQL integration.

Summer Intern – IIT Kanpur Fellowship

Apr 2024 – May 2024

- Optimized scientific simulations using C vectorization, profiling, and memory tuning.

Technical Projects

Cold Storage Management System

- Built a production-deployed cold storage management system under a NIC contract.
- Designed and implemented a 3-layer architecture REST API using ASP.NET MVC, EF Core, and SQL Server.
- Handled database design and backend logic.

West Bengal Grading and Marketing Certification

- Developed a lab management system for commodity testing and result generation under a NIC contract.
- Built backend modules using C#, .NET, and SQL Server.

GDS – Webhook Integration Module

- Worked as backend developer on the GDS project, resolving client-reported issues related to data flow and endpoint reliability using C#, .NET, and SQL Server.
- Performed data rectification and correction, fixed and optimized stored procedures and cursors to ensure data integrity across client environments.

ERP Billing Management System

- Personal clone and extension of an ERP billing system built with ASP.NET MVC 8, EF Core, and SQL Server using 3-layer architecture.
- Covers GST invoicing, payment tracking, and a live revenue dashboard.

Ransomware Detection using LSTM

- LSTM-based ML model using Python and TensorFlow to detect ransomware behavior from system logs.

Plant Disease Detection – ML Classifier

- Computer vision classifier to identify plant diseases from leaf images and recommend treatments.

Technical Skills

Languages	C#, SQL, JavaScript, Python, C, Java
Backend	ASP.NET MVC, .NET, EF Core, REST APIs
Frontend	HTML, CSS, Bootstrap, JavaScript
Databases	SQL Server, PostgreSQL, MySQL
Architecture	3-Layer Architecture, Repository Pattern
Tools	Git, GitHub, SSMS, Visual Studio

Education

Master of Computer Applications (MCA) – University of Calcutta CGPA: 7.98	2023–2025
B.Sc. in Computer Science – Sidho-Kanho-Birsha University CGPA: 9.62	2020–2023
